REX

REMOTE CONTROL

A well-organized and elegant remote with RF non-directional control

GOOD DESIGN AT YOUR FINGERTIPS

The new REX remote control has an elegant smooth design, well placed in your hand. A simple and straight-forward organization of keys enables one-hand operation and easy reach to most desired keys. It has enough keys to shortcut to all frequently used functions.

Used with our RF STBs you have complete directional freedom, there is no need to point the remote at the set-top box. The signal will even pass through cabinets or walls, enabling the set-top box to be hidden behind the TV or elsewhere. The remote is easily paired with the selected set-top box for proper operation.

The remote is available in two variants; one using infrared communication (IR) and one using radio frequency communication (RF) with Zigbee compliant RF4CE.
