

Headend Optics Platform (CH3000)

AT3300G-A-2

Analog 1310 nm Transmitter (Standard Performance 1 GHz Model)

FEATURES

- Link loss budgets available from +3 to +14 dB
- 46–1002 MHz RF bandwidth
- Enables very high rack density (14 transmitters per 3RU chassis)
- Occupies only one full-depth slot
- +15 dBmV/channel RF input drive level
- Second port for narrowcast input (with AGC)
- Superior flatness, ± 0.5 dB
- Front access –20 dB input test point
- Front panel laser On/Off interlock switch
- True dynamic plug and play
- Open standard TCP/IP SNMP support
- Local and remote status monitoring features
- Local and remote RF level control and alarm level settings

PRODUCT OVERVIEW

The ARRIS AT3300G-A-2 series 1 GHz 1310 nm Transmitters provide increased bandwidth capacity for the expanding service demands of HDTV, VoIP, VOD and high-speed DOCSIS. These transmitters are ideal for broadcast and narrowcast applications for optical transport with link losses ranging from 3 to 14 dB.

The AT3300G-A-2 is available with dual 46 to 1002 MHz RF inputs for combining separate broadcast and narrowcast inputs within the transmitter. These dual inputs are designed to provide 50 dB isolation between the narrowcast and broadcast inputs to protect against NC crosstalk on adjacent transmitters via the RF drive network. Its AGC circuitry compensates for variations in the RF input level to the transmitter to maintain constant transmitter output RF drive level to the laser.

High-density packaging enables network operators to install up to 14 transmitters per 3RU chassis, all of which can be monitored remotely or locally from the power supply module. Additionally, the compact single-width module design can be plugged into either the front or the rear of the CH3000 3RU chassis to optimize equipment installation and operating conditions.

The compact design minimizes rack space requirements in headends or hubs and enhances deployment of traditional HFC, passive HFC and fiber-to-the-home (FTTH) networks.

SPECIFICATIONS

Characteristics	Specification																																				
Physical																																					
Dimensions	13.0" D x 4.3" H x 1.0" W (3RU) (33 cm x 11 cm x 2.5 cm)																																				
Weight	1.7 lbs (0.77 kg)																																				
Environmental																																					
Operating temperature range	0° to +50°C (32° to 122°F)																																				
Storage temperature range	-40° to +85°C (-40° to +185°F)																																				
Humidity	5% to 95% non-condensing																																				
Power Requirements																																					
Input voltage	12 V _{DC}																																				
Power consumption	12 W
