PRODUCT OVERVIEW:

The ARRIS Follow Me TV Mobile Application works in conjunction with the ARRIS Media Gateway MG5000 Series as well as the ARRIS DCX3635. The ARRIS Follow Me TV Mobile Application can also deliver TV Everywhere services for any operator that has the necessary ABR content processing infrastructure in their head-end. Now all the ways you enjoy TV entertainment at home are available on-the-go with our newest version of the ARRIS Follow Me TV Mobile Application. Using the program guide, users can select and stream Live TV and recorded content to their mobile handset, manage DVR settings and have full control of their media gateway or media players. We even added parental controls to make sure that only appropriate age content is viewed throughout the family.

The ARRIS Follow Me TV Mobile Application supports video playback of linear TV, recorded TV and Over-the-Top streaming of linear content inside and outside the home.

Inside the home, the ARRIS Follow Me TV mobile application becomes the remote control center allowing users to search, discover, and navigate on-the-go without interrupting the TV show that is being watched on the big screen. See new TV shows, view guides, search TV shows and manage your recordings quickly and easily.

GENERAL SPECIFICATIONS

iOS8 / iOS9 and Android 4.3 or higher support

Dynamic Branding – Allowing operators to feature product / company logo, customer support sites, advertising banners as part of the end user experience.

Video Streaming – Playback Live TV shows or Recorded TV shows, inside the home (up to 4 HD streams) or outside the home (1 stream). (Requires ARRIS MS4000™ Media Streamer. Over-the-Top streaming of Live TV channels using SecureMedia DRM).

Browse the channel guide – View upcoming TV programming without interrupting the TV shows you are watching. View channel listings up to 14 days in advance.

Comprehensive guide listing: Programming guide – View upcoming episode and series information as part of the show info screen, cast and crew information as part of the episode information.

Remote scheduling – Schedule a TV show or movie while on-the-go.

Recordings management – Browse your recorded programming and manage your DVR schedules (delete, set priorities, etc.) remotely.

Search – Instantly search your TV listings, recordings, VOD and PPV channels and schedules, and browse shows while you are away from home.

Remote control – Start watching a show on your Media Player with a tap of a finger.

Parental Controls – Put restricted access on your Mobile Application and control what TV programs your child can view.
