PRODUCT OVERVIEW

ARRIS NP35C0x series of combiner/separator filters are 3-port filters that combine (or separate) red and blue (or CWDM and DWDM) bands. The various available band combinations are shown graphically on the following pages. In addition to packages containing a single filter, dual-filter packages are also available, and both single- and dual-packaged filter modules are also available with an optional -20 dB tap for monitoring. These filters are designed to be used in controlled indoor environments within a temperature range of -20° to +65°C.

Passbands for Combiner/Separator Filters

For **nb** = 00, 02, 03, 09, 0A, EB, ED, 0E, or 0F, bands are identified as red or blue.

For **nb** = 04, 05, or 06, bands are identified as CWDM or DWDM.

For **nb** = 07 or 08, bands are identified by a channel group designator for a range of ITU DWDM channel numbers.
